Notes

* Capacities shown are Application Capacities reflecting nominal operation at 10°F TD. For models within the scope of the DOE AWEF (Annual Walk-in Energy Factor) standard, the Net Capacity is determined by the AHBI 1250 test method. DOE will publish this complicate date at ways complete day and

is determined by the AHRI 1250 test method. DOE will publish this compliance data at www.regulations.doe.gov $\label{eq:complexity}$
